

pmeHotel - sistem za upravljanje hotelskim poslovanjem

Sistem za upravljanje hotelskim poslovanjem unapređuje efikasnost obavljanja svakodnevnih poslovnih aktivnosti hotela, kao što su rezervacija soba, prijavljivanje i odjavljivanje gostiju, upravljanje smeštajnim kapacitetima, opsluživanje potreba gostiju. Korišćenjem sistema informacije o izvršenim rezervacijama su odmah dostupne, smanjuje se obim administrativnih poslova i mogućnost overbokinga.

Za korišćenje sistema nije potreban klasičan softver i hardver. Korisnici pristupaju sistemu preko web pretraživača na desktopu ili mobilnom uređaju, dok se softver i korisnički podaci nalaze na serveru.

Funkcionalnosti:

- Sistem za rezervaciju soba
- Upravljanje smeštajnim kapacitetima
- Online informacije o svakoj sobi
- Evidencije transakcija
- Kreiranje izveštaja i statistika
